Dear Parent

RE SCHOOL MILK

You may not be aware, but under the new School Food Plan, the Government have stipulated that from January 2015, all children in primary and secondary schools are to be offered milk on a daily basis whilst in school and your school has decided to use Milk4Life to administer the milk scheme on their behalf and as such, please find attached the instructions in a 10 step format for you to follow to register your child and order and pay for your milk. Obviously, initially, you will have to fill in all your details so our system can set you up a new account but then going forward you will have your own account number where you can then re-order etc.

There is a base price showing on the site, but this is subject to a unique discount code offered to your school and once that code is input then this will determine the price for your child's milk.

If for any reason, you cannot access the online system then please contact Sally Ann Browes on 01246 234222 who can then take your details, set up your account and your order. If Sally Ann is unavailable then please ring 07979 704894.

I hope you will continue to offer your child the opportunity to have milk at school as it is an extremely good and easy way of helping to give your child part of their daily calcium requirements and of course has many other nutritional benefits as follows:

- Milk is packed with calcium needed to build strong bones
- It provides a broad range of other essential minerals
- It provides a wide range of vitamins
- Milk is a great source of body-building protein and energy

No other drink delivers such a nutritional package. Milk is natural with no additives and is also safe for teeth. Dentists and dieticians agree that the safest drinks for children are milk and water, especially between meals.

If you need anything further, please feel free to contact me on 07979 704894.

Yours sincerely

Barbara Griffiths
